Education

ABES Engineering College

Nov. 2022 – Present

- Bachelor of Technology in Computer Science

Shardein School, Muzaffarnagar, UP

2022

- Class XII

SkillSet

Languages: JavaScript, Java

Web Technologies: Springboot, MySQL, React.js, Express.js, REST APIs, Tailwind, Web3.js, Ethers.js, MongoDB

Core Skills: Full-Stack Web Development, Data Structures & Algorithms (DSA)

Developer Tools: Postman, GitHub, Vercel, Render

Experience

Freelance, USA (Remote)

Fullstack Developer

- Developed and maintained dynamic web applications using React, Node.js and Express.js.
- Collaborated with cross-functional teams to enhance user experience and optimize application performance.
- Led technical team delivering blockchain solutions that generated \$10,000+ in client revenue
- Developed multiplayer blockchain infrastructure capable of supporting over 100+ concurrent users
- Integrated third-party services and APIs to extend application functionality.

Projects

Billing Software

GitHub Feb. 2025

- Built full-stack retail billing system with JWT auth, RBAC & dashboard analytics.
- Integrated Razorpay for seamless UPI transactions, enabling cashless payments and scalable file storage.
- Built a comprehensive POS system with shopping cart functionality, automated tax calculation, receipt generation, and order history tracking.
- Improved retail ops with order history & receipt generation → boosted efficiency 30%.

Product Catalog API (Spring Boot + MySQL)

GitHub May. 2025

- Built a Spring Boot + MySQL Product Catalog REST API with clean layered architecture and JPA for ORM.
- Designed targeted indexes (category, price) and a composite index (category+price) to optimize frequent queries; added service-level metrics to measure executionTime.
- Reduced category/price query latency from 200–500ms to 10–25ms using targeted and composite indexes and validated performance via Postman-driven test scenarios.
- Scaled reads predictably up to 10,000+ records while maintaining low latency.

AI-Powered CRM Campaign System

Live GitHub Jan. 2025

- Built a MERN stack CRM platform with Google OAuth authentication, MongoDB database, and RESTful APIs.
- Developed intelligent campaign system with OpenAI GPT-3.5 integration for automated message generation and dynamic customer segmentation.
- Created responsive UI using React, Tailwind, and Shadcn/UI with protected routes and real-time data visualization.
- Implemented scalable Node.js backend with JWT authentication, Winston logging, and comprehensive error handling.

Achievements

- Led a team of 5 developers, managing freelance projects and generating \$10k+ in revenue
- Ranked in the top 10 at the Code-e-Manipal Hackathon

Additional

Leadership: Admin of a 10,000+ member Web3 community on Instagram.

Languages: English (Conversational Proficiency)
